Robotic Process Automation Software

RPA

Over 1,000 Companies* have adopted NTT's RPA

* As of Apr-2018

Key Benefits

Improve Quality

Errorless processing of massive data

Enhance Lead Time

Incredibly fast

Save Costs

Replace full-time employees

What RPA is:

RPA replaces human actions associated with variety of application processes such as authentication, verification, data entry, complex calculations, and transferring data. The software automates almost every rule-based tasks.
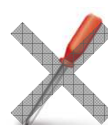

24*7*365 Full Operation

No System Development

No Changing in Existing Systems

Rule-based tasks

Digital Transformation Journey Starts with NTT's RPA!

NTT COMWARE

- RPA sales (Japan) reported 400% growth in 2016.
- RPA sales (Global) expected to become US$1224 million market in 2021.

(Source: Nikkei(Japan)/ITR Market View, Statista, Deloitte, RPA Technologies and CW Analysis)

Features of NTT's RPA*

Our RPA solution has lower barrier to adopt and automates Windows application operations, resulting dramatic improvement in work efficiency.

Desktop Automation of Windows Applications

Compatible with any application running on Windows.
- *E.g. Microsoft Office, ERP package product, browser-based application, individually developed system.*

Low IT barrier for all level of Staff

Easy-to-use GUI enables easy programing.
